OUR SERVICES

ABOUT AEGIS

Aegis is an Australian multi-disciplinary consultancy that specialises in asset management of property and civil infrastructure, as well as remediation and maintenance.

OUR CLIENTS & TEAM

Aegis' clients are facilities managers, asset managers, maintenance managers, procurement managers, building owners, and strata portfolio managers drawn from private, commercial and public property sectors. They require sustainable asset management strategies, with remediation and maintenance costs forecast and manageable, to achieve value for their investments as well as continuity of cash flow.

Aegis provides qualified and highly experienced engineers who consider the costs and benefits of maintenance options, and can offer innovative and customised advice, enabling our clients to make smart business decisions.

Aegis' management are qualified engineers and highly experienced in asset management, property and civil infrastructure, estimating, construction, remediation and maintenance throughout Australia.
